About ASSIST

Established in 2003 with the simple aim of addressing sustainability challenges in the country, ASSIST has now evolved into a developmental organisation with passion and purpose for progress and prosperity across the region.

ASSIST takes pride in bringing together a right mix of professionalism, social responsibility and commitment to effectual development. While our ultimate aim is to bring about social improvement and sustainable transformation in the region, we fully understand the practical challenges and roadblocks it entails.

Hence to better fuel our ambitions, we are organised as a service-oriented enterprise with strong expertise in specific areas to deliver key services. Our learnings and proceeds from projects in the form of **grants, service contracts** and **corporate partnerships** are put to use appropriately into our **social actions** that create programs with sustainable and lasting impact.

AsianNGO through its rich information platform and strong research serves as our strong pillar in capacity building.

About LCDS

“Good content development and instructional design is critical to achieve the right impact.”

‘Content is KING.’ With the advent of new content and the pace at which it is generated today, it is imperative to have the right structure, approach, information and relevance for the intended audience to take note and for the content to achieve its purpose – regardless of medium, length or nature.

Good content development and instructional design can help achieve exactly the above.

With over **15 man-years** of instructional design experience, **5,000+ hours** of content development record and **100+ customers** from multiple industries across the world, ASSIST helps strategize, design, articulate and publish content in various media forms for research reports, corporate publications, digital / e-learning content and web-based tools.

Key Works + Major Work Products

Design Conceptualization

Content without concept has no impact. We create compelling design concepts that set the basis for developing engaging content with quality information at the right quantity.

Instructional Design

Context, structure and message are critical for content of any form to achieve its purpose. We follow instructional design tools in applying design-thinking principles to get the message across.

Storyboard Development

Weaving a story that learners can relate to is critical to ensure resounding reach of the material needed. Our team of instructional designers works closely with creative writers and develops storyboards that drive learning, performance and engaging experience.

Content Development

Built around its unique S.E.C (Strategy-Execution-Collaboration) framework to offer end-to-end learning solutions ranging from creating the organization's vision and executing the same, to managing and supporting the vision throughout by serving as a true and trusted partner. The model leverages on the organization's capability, wide domain expertise, established operational excellence, a decade of experience and above all the commitment to deliver continued excellence.

Web & Mobile Development

With the advent of web technology and ubiquitous presence of smart phones, creating and delivering information through bite sized apps.

Content Translation & Localization

We create multilingual versions of content to meet the localization requirements of our clients. Our team of excellent native language experts and voice over artists enable us to deliver high quality outputs.

Multimedia Design & Development

Learner interaction and engagement is key to the success of e-learning. Creating multimedia elements / animations is a vital piece to the puzzle of learner engagement. Depending on the target audience intended to address, we create games, cartoons, real-life characters and abstract models / graphics to achieve this impact.

Research & Technical Writing

Good technical writing is essential to present complex content in a way that is easy to understand, not to make it more twisted than what it already is. With a team of writers that blend context, subject matter and structure, we design and create technical documents such as user manuals, administration guide, installation manual, quick reference guides, and technical training manuals.

Importance of Communication
Being able to talk to others and communicate is an effective tool to leading business and creating a more successful organization.

From Debate You can Learn:
 - **To overcome Obstacles:** You will learn that there are things in your path to achieving a goal of achieving your thoughts in a way that is clear and understood.
 - **Transfer of of ideas to an issue:** You have need to defend what you do to believe its, understand going on understanding of how you think about the issue through understanding.
 - **To know better:** You need to clearly take to what happens every time you do and appreciate the importance to know why, to what to expect and how to respond.

Debate Motions
The best practice is to start with only one topic. This issue refers to a social or political issue. This issue refers to the social or political issue and is usually a statement or question. The issue behavioral governments should act. There are several other that concern the amount of the youth.

Two popular debating formats around the world are British Parliamentary and Public Forum. Each format has its own specific.

Building an Argument
Debates are usually given an opening where you get to make your point. It is usually a 3-4 minute period for you to make your point. You can make your point by an opening, but not on each opening.

I2Can
Inspire & Ignite

I2Can is a series of experiential learning programs designed to provide children from urban poor and rural communities in South India with practical life skills.

We aim to strengthen traditional education by innovative interventions that prepare young people for the responsibilities and challenges of adulthood.

I2Can empowers the youth to learn, earn, thrive, and contribute to the future of their communities.

The Risk Profile Model

All hazards identified on the factory level were classified under three clusters that constitute the Industry Risk on the building safety.

Risk Classification - Industry Risks

A. Automatic Fire Suppression Systems

Automatic fire suppression systems in this facility are absent or inadequate or absence of automatic fire suppression system will result in the immediate threat and non-compliance of the automatic suppression system will help identify and control the fire (fire rating for the building level).

Hazards	Risk Value
A1 Automatic system is not available in any area of the facility.	12
A2 Detection device (fire) is not available in the facility.	12
A3 Alarm and control device are not working in the facility.	6
A4 The facility has no automatic fire suppression system.	6
A5 The detection device is not available in the production plant.	6
A6 The alarm and control device are not available in the dormitory building.	4

B. Firefighting Equipment

Firefighting equipment are deemed ineffective because of obsolescence or improper installation. Basic firefighting equipment such as the extinguisher and fire hose are the first line of defense against the accidents. Therefore, basic equipment must always be in good working condition and ready available.

Hazards	Risk Value
B1 Fire extinguisher is obstructed.	12
B2 A portable cable type extinguisher is not appropriate installed.	6
B3 Fire hose used in the workshop is not adequate.	6
B4 The hose of a fire extinguisher is not properly installed.	4

C. Means of Escape

Means of egress in the event of an emergency are non-compliant, obstructed or non-adequate. All egress routes have clearly identified and accessible means of egress in all levels across that responses can be made in the event of fire.

Hazards	Risk Value
C1 Employees with an invalid and non-readable emergency lighting levels.	12
C2 Emergency lights and directional sign are insufficient.	6
C3 Emergency lights are obstructed.	6
C4 There is emergency exit at the dormitory.	6
C5 The direction of the door emergency opening is against the direction of egress travel.	6
C6 An emergency exit pathway is passing through a hazard area.	6

IN-HOUSE TRAININGS

Are you looking for more than just getting an off-the-shelf program from the course list?

Would you like to work with novel techniques to better approaches and address your company's specific needs?

If you answered "YES" to any of the above questions, our in-house training programs could be your answer!

Our tailored workshops cover traditional topics in 3 dimensions:

- Behavioral
- IT Excellence (ITE)
- Business Process Excellence (BPE)
- Behavioral Excellence (BE)
- Corporate Sustainability & Governance (CSG)

For most of our customers, the list is a starting point.

This is our approach when it comes to creating new programs or enhancing existing ones: we tailor programs best fit for your needs!

YOU APPROACH

HIGHLIGHTS

- Customized to your needs
- Reported by you and your customers
- Tailored content and study guides
- Tailored assessment tool
- Progressing Language

LEARNING ON DEMAND

eLearning modules and CD-based trainings are now significant complements to E-Learning (structured Training) - either as pre-requisites or as follow-ups to workshops.

With expertise in instructional design, multimedia development, content creation in video, document areas and strategic partnerships, former post across a wide array of other domains, we offer a variety of L2D Learning on Demand products in the form of eLearning and eLearning CD's.

Benefits:

- Interactive and Self-paced Learning
- Time and Cost Saving
- Location Independent Learning Tools
- Discontinued Courses
- Fully Equipped Classroom
- Content Review and Track for Learners
- Supporting High Sector

Key Features:

- Interactive Authorware Training
- Flexible Content and Templates
- Multimedia Content
- Fully Equipped Classroom
- Content Review and Track for Learners
- Supporting High Sector
